Oracle Crystal Ball is a comprehensive tool for risk measurement, Monte Carlo simulation, and time-series forecasting and optimization. Objectives of this book To set a common foundation for risk measurement, Monte Carlo simulation, and time-series forecasting, and To offer unique tools for risk measurement and forecasting. Some of the tools in this book All risk measurement tools can be used to produce a range of interesting measurements. Why Oracle Crystal Ball? Oracle Crystal Ball extends the power of traditional spreadsheets. It includes special functionality and features, built in a traditional way,

making it easy to use. When Oracle Crystal Ball was introduced, it was one of the first packages to embrace the 'perfect spreadsheet' technology of standard spreadsheet packages. It was possible to take the traditional spreadsheet program to a new level. The tools are built in a traditional spreadsheet program, so they are easy to use and understand. Oracle Crystal Ball is not a modelling program. It is not a general-purpose risk management tool, designed to simulate complex systems. Rather, it uses standard spreadsheet functions to measure, forecast and optimize. The modeling power of a general-purpose simulation

tool is based on the power of a traditional spreadsheet. However, the most powerful simulation tool in the world doesn't show you the results you want - it just makes a lot of calculations. Oracle Crystal Ball is a tool to measure risk. It can be used in any organization, providing the organization is able to install it. Integration into other Oracle products Oracle Crystal Ball is developed with Oracle 9i and later products in mind. It has been designed to work in an Oracle environment. As a result, it supports a wide range of other Oracle products: Oracle 8i Oracle 9i Oracle 9iR2 What you will learn Oracle Crystal Ball does

not teach you new programming skills. You learn to use standard functions and formatting capabilities, the same way you learn to use Microsoft Excel. The most widely-used risk measurement tool in the world You will learn about some of the most widely used risk measurement tools, including Crystal Ball SAP Crystal Ball RiskCalc CreditSettle How to use Oracle Crystal Ball Oracle Crystal Ball is an integrated package. You start by opening a workbook and making a spreadsheet. The spreadsheet can be in any size. You can use as

Oracle Crystal Ball is a spreadsheet based application for risk measurement and reporting, Monte Carlo simulation, forecasting and optimization of time series. Oracle is an American company that provides software applications to organizations and individuals. The company was founded in 1975 by Larry Ellison. Oracle is the world's number one software vendor with over \$13 billion in annual revenue and more than 20,000 customers in 150 countries. Oracle is the third most valuable brand in the world and the fourth most valuable global smart brand. fffad4f19a
