Scribus has won numerous awards, including an X awards Gold prize in 2004 for Best Free Software. Scribus is developed by the KDE community and Debian developers, and is primarily developed under the GNU GPL license. It is also available under the terms of the LGPL. For more information, see the Scribus website and documentation. Scribus is an initiative of the Libre Graphics Meeting and is developed by the Scribus Team of volunteers. Scribus is very configurable and, with some experience, fairly easy to use. It has most of the features available in other commercial publishing products, but is designed primarily for free use. There is currently a project to port the version 0.5.0 to other platforms. For more information see the web page for the port project. SketchUp is a powerful, intuitive 3D design program.
