In 2001, it became the flagship product of the Autodesk product family, alongside the competing software applications of other Autodesk product divisions such as DesignWorks 360 and 3ds Max. On 2 June 2014, Autodesk released AutoCAD 2018, a new version of AutoCAD with an updated user interface and several major architectural changes including: The Window and Navigation Bar used to display the AutoCAD workspace, tools, and commands has been replaced with a new Navigation Bar and Ribbon. Plugins are written in a new programming language called code blocks. The command palette, which is used to invoke command-line and menus-based operations and commands, has been re-written to run within the new code blocks programming language. Contents The first released versions of AutoCAD are referred to as releases "1.0" and "2.0". Later releases, e.g. release "3.0" or "4.0" are known as interim releases, but it is not unusual to refer to a new release as a version number such as "16.0" or "17.0" (for release "16" and "17"). Over the years, AutoCAD has been revised and updated several times. The major revisions are called "Patch" releases. These patches include the addition or removal of features, bug fixes, and minor architectural changes. Patch releases are also referred to as incremental releases. Patch releases of AutoCAD are numbered sequentially from 1 through 99. The current version is AutoCAD 2018. The latest released versions of AutoCAD are given AutoCAD R3 and AutoCAD LT. These versions have the ".r3" or ".lt" file extension. The latest released version of AutoCAD is version 2018. AutoCAD LT (formerly AutoCAD Design Premium) supports most of the features of AutoCAD, plus certain unique features of AutoCAD R3. The latest released version of AutoCAD LT is version 20. AutoCAD is available as AutoCAD LT for Windows and macOS, AutoCAD R3 for Windows, Linux, and macOS, AutoCAD LT for Android, AutoCAD LT for iOS and AutoCAD LT for Raspberry Pi. AutoCAD is also available as AutoCAD Web Design Premium, a cloud-based service that lets users access their drawings from any web-enabled device. AutoCAD

Its users were always the same in the beginning, but currently, it is being used by many architects, engineers, draftsmen, and other professionals for all their drafting and design needs. The first AutoCAD release was in 1987. From its first release, the product has continuously been updated in order to improve its features and performance. AutoCAD 2000 AutoCAD 2000 came out in 1992. This was a commercial product aimed at architectural and engineering professionals. It can create drawings and data (DAT). AutoCAD 2000 also introduced some of the first web design programs, such as: AutoCAD Web, which was developed to provide an easy way to use the AutoCAD 2000 software as an online CAD application through a web browser. AutoCAD Web Designer was a web design application for AutoCAD 2000. AutoCAD 2000 included many new features: Improved parametric and standard drafting tools Faster and more accurate importing/exporting, including the ability to use some DAT formats for import Textured shaded surfaces Enhanced drawing tools and features In 2002, the large-scale 3D CAD modules were discontinued. The system was enhanced with the ability to work with most DAT file formats, CAD interchange file formats, and various drawing tools. In 2003, AutoCAD Web Designer received improved ability to work with DAT formats, native multiple file import/export, multi-threading, and other improvements. In 2004, the drawing tools, as well as the new connected embedded web browser application were enhanced with the ability to work with various legacy DAT formats. The crash took place after the Indian Air Force took off a pilot from the MiG 21 Bison. A Pakistan Army official confirmed that a MiG 21 was hit after it attempted to cross over to Indian side of LOC. "We had an intrusion by a Pakistani helicopter about two to three kilometers inside our side," said a senior Pakistani army official. The crash comes a day after an Indian MiG 21 was shot down by a Pakistani Air Force aircraft near Line of Control in Jammu and Kashmir. The Pakistani military official who spoke to India Today denied that any MiG 21 was shot down. The Pakistan Air Force official was also categorical in saying that "no helicopter of Indian military was shot down from across LOC." The Pakistani Army official said "They attempted to infiltrate our side. Our forces have been waiting for them. They were hit in the process. Two or three soldiers were killed. They have returned safely to our side." According to a senior Indian Army officer, the Indian Air Force used a long-range missile, which hit the MiG 21 near the LOC in Jammu and Kashmir. "The crash occurred in mid-air, in the atmosphere. We couldn't pinpoint the exact site of the crash. It's the responsibility of the Pakistan Air Force to have informed us earlier. The Pakistani military was immediately informed of the intruding helicopter and we used a long-range surface to surface missile to shoot it down.
