The world of Roblox begins in the year 2007. Dr. Ken (the founder and CEO) stated that he started Roblox to give children a fun place to play. He didn't have children of his own at the time and was tired of dealing with violent kids on other gaming platforms. In 2006 Dr. Ken started working on the platform and programming language. The first games were released in May 2007. The purpose of the game is to create a character by combining objects. Another big difference from most other games is that you are able to control the character's body and actions. This allows you to create truly creative characters. Since characters can also be "built", the platform has become one of the most popular places to play games. Within the first two years of its release, it had around 30,000 registered users. By the end of the year the company grew to 100 employees and closed a \$24 million investment round. Other investors include Y Combinator, SV Angel, and Javelin Venture Partners. There are several different types of games made for Roblox. Some are created for the younger audience while others are geared more toward the teens. Some of the more popular types are Minecraft, Pokemon, and Roblox Robots. Nintendo DS and Japan Game Ratings: > Objects that are usually used to make things easier for players are very helpful. These can be found in standard game levels and objects. For example, items can be obtained from chests, walls, and other places. >> These can be found in chests, walls, and other

The context-dependent resources enable the developer to influence the display of media content. For example, news publishers may choose to display only a short description of what the reader sees when viewing the web site (instead of a longer version), or a sign of what viewers will see when they are transferred to an offline version of the page. Flash includes a Rich Internet Application (RIA) standard for this purpose.[20] It is recommended that authors use metadata to describe the content at a low level of abstraction in order to make it accessible to rich media applications.
